### D. STEAK PAPER

### PAC PAPER

Black steak paper creates a striking and attractive contrast that conveys premium quality.

Steak paper allows the passage of oxygen to delay the natural discoloration of meat as it ages. To be effective, it must cover all surfaces, so the meat does not come into contact with other layers of meat. Steak paper is designed for presentation rather than long-term storage. Therefore, the use of the paper for more than 24 hours is discouraged.
